KU Summer School

20 July - 09 August, 2025

www.ku.de/summerschool

The Catholic University of Eichstätt-Ingolstadt (KU) gives students and professionals from all over the world the opportunity to study abroad in the heart of Bavaria. You can choose between three different courses that include language classes to suit your level of proficiency. You will gain valuable insights into German and Bavarian cultural traditions, literature and history, and also have the chance to visit iconic landmarks. We organize excursions to destinations such as the UNESCO World Heritage Bamberg and Ingolstadt (famous for AUDI).

We also offer a varied range of workshops for you to choose from, depending on your interests. The KU International Summer School will be an unforgettable experience for you.

Additionally, university students can earn credit points (5.0 ECTS or 6.0 US Credits) according to the regulations of their home university.

Course 1 | Explore Germany and Bavaria! Intensive German Language and Cultural Studies

In this course, in addition to improving your German language skills, the central theme will be regional studies, combined with writing, reading, and conversation exercises. The goal for you is to expand your vocabulary, gain confidence in expression, and be able to discuss interesting topics in German. Participants can actively participate in the selection of topics for the course. Current topics concerning Germany are offered, but the intercultural component is always essential.

The main focus of this course is on expanding the personal communicative scope, which is achieved through methods such as short presentations and work in small groups.

Language requirements: German A2-C1

Course 2 | German Literature in Movies – Intensive German Language Programme and Seminar in Literature

During the three-week language and literature course, participants deepen their German language skills in all areas, such as speaking, listening, writing, and reading, in morning classes.

Hardly any other topic is currently being discussed as controversially as the use of artificial intelligence and its significance for the future of humanity.

The public perception of AI is often influenced by literature and film. The science fiction genre in particular has had a lasting impact on our imagination. Using selected example works, we want to examine together how the topic of artificial intelligence is implemented in literature and film and how fictional representations affect the audience's perception. In addition, we will deal with the possible consequences that the use of AI brings with it for the literature and film industry.

Language requirements: German B2-C2
