## Work Offered

About the project:
We are currently building an exercise database online which would be used to track students and suggest exercises to students individually. The primary student target for this database is first-year students for computer science. For the work at IAESTE we are looking the right candidate to be a part of a team that is to finalise and publish this database. We also need to fill some of the content.

What we are looking for:
We hope to assemble a team that has knowledge which can cover as many as these fields: artificial intelligent algorithms, front-end developer, back-end developer, graphic designer, database, server publishing.

A qualified candidate for this project is someone interested in development of new and innovative solutions. The right candidate is creative, dutiful and independent. There will be opportunities for extending this project more than 6 weeks.
